To whom it may concern,

I want to recommend Preciate Pass, a fantastic facial recognition solution that saves us a great deal of time and money!

Over the past two months, many public locations, like soccer stadiums and concert halls, have re-opened in Israel.

However, only vaccinated guests can enter. Checking each guest for a photo ID and a valid vaccination certificate takes time and a large workforce.

As the CEO of *Meteor*, a large security company, I was looking to use my existing team of ushers without adding to it. However, I still want to provide the best possible service. Preciate Pass allows just that!

I was surprised at how fast the system's installation was and how flawless it made admitting audiences to stadiums.

If it weren't for Preciate Pass, we would have spent approximately 50% more on staffing.

Golan Ohayon,  
CEO

Meteor Security
